Cart Service Installation on CentOS 9

Step 1

Login as root (id -u).

Step 2

Disable default NodeJS:
dnf module disable nodejs -y

Step 3

Enable NodeJS 20:
dnf module enable nodejs:20 -y

Step 4

Install NodeJS:
yum install nodejs -y

Step 5

Create application user:
useradd roboshop

Step 6

Create application directory:
mkdir /app

Step 7

Download application:
curl -L -o /tmp/cart.zip https://roboshop-builds.s3.amazonaws.com/cart.zip

Step 8

Extract application:
cd /app
unzip /tmp/cart.zip

Step 9

Install dependencies:
npm install

Step 10

Configure cart.service with REDIS_HOST=<Redis IP/Hostname> and CATALOGUE_HOST=<Catalogue IP/Hostnam

Step 11

Copy service:
cp cart.service /etc/systemd/system/cart.service

Step 12

Reload and start service:
systemctl daemon-reload
systemctl enable cart
systemctl start cart

Step 13

Verify:
systemctl status cart
