Redis Installation on CentOS Stream 9 (Roboshop)

Service Overview

Redis is an in-memory cache used by Roboshop. User and Cart services depend on it.

Install Redis

Install Redis.

```
dnf install redis -y
```

Configure

Edit /etc/redis/redis.conf and change bind to 0.0.0.0.

```
bind 127.0.0.1
# Change to
bind 0.0.0.0
```

Start Service

Enable and start Redis.

```
systemctl enable redis
systemctl start redis
systemctl status redis
```

Verify

Verify port 6379.

```
ss -lntp | grep 6379
```
