RoboShop Catalogue Setup (CentOS Stream 9)

Install NodeJS

```
dnf module disable nodejs -y
dnf module enable nodejs:20 -y
dnf install nodejs -y
node -v
npm -v
```

Add Application User

```
useradd roboshop
```

Create Application Directory

```
mkdir -p /app
```

Download Application Code

```
curl -L -o /tmp/catalogue.zip https://roboshop-artifacts.s3.amazonaws.com/catalogue.zip
cd /app
unzip /tmp/catalogue.zip
```

Install NodeJS Dependencies

```
cd /app
npm install
```

Configure Systemd Service

```
Create /etc/systemd/system/catalogue.service

[Unit]
Description=Catalogue Service

[Service]
User=roboshop
Environment=MONGO=true
Environment=MONGO_URL="mongodb://<MONGODB-IP>:27017/catalogue"
ExecStart=/bin/node /app/server.js
SyslogIdentifier=catalogue

[Install]
WantedBy=multi-user.target
```

Reload and Start Service

```
systemctl daemon-reload
systemctl enable catalogue
systemctl start catalogue
systemctl status catalogue
```

Configure MongoDB Repository

```
Create /etc/yum.repos.d/mongodb-org-7.0.repo

[mongodb-org-7.0]
name=MongoDB Repository
baseurl=https://repo.mongodb.org/yum/redhat/9/mongodb-org/7.0/x86_64/
gpgcheck=0
enabled=1
```

Install MongoDB Shell

```
dnf install mongodb-mongosh -y
```

```
mongosh --version
```

Load Schema

```
mongosh --host <MONGODB-IP> </app/schema/catalogue.js
```

Verify Schema

```
use catalogue
show collections
db.products.find().limit(5)
```

Health Check

```
curl http://localhost:8080/health
Expected Output: OK
```

Restart Nginx

```
systemctl restart nginx
```
